

**COMPULSORY
MICROCHIPPING
FOR DOGS!**

pet id
-MICROCHIPS

The ultimate
microchip
identification
system

Identify your pet
with **Pet-ID Microchips**

FROM 6th APRIL 2016
ALL DOGS OVER 8 WEEKS OLD

In England & Wales Dog **MUST** be microchipped
Not only will this improve animal welfare and
develop responsible dog ownership but it will
also help establish and deter theft.

However, if the unthinkable happens and your
pet goes missing, you should immediately
report it to Petlog on 01296 336579.

Once in the care of a rescue centre or animal
Warden, your pet should be scanned, Petlog
Should then be contacted and the registered
details you have provided against the microchip
will enable you and your pet to be reunited.

I am a qualified microchip implanter, recognised by the kennel club and pet log. I will scan, microchip and give basic registration to the database for your dog, for **£15.00**. If you have 3 or more dogs, or are a breeder with a litter of 3 or more puppies contact me for special rates. (If a dog is found I will scan it and notify the relevant authorities No charge for this service) if it has a microchip.
